

Corporate IT Security and Access Control Policy

Document Reference: REF-IT_SECURITY_POLICY-2024

Security Classification: INTERNAL (Clearance Level 1)

Effective Date: November 12, 2024

Author/Auditor: Secure Ops & Corporate Governance

1. Password Policy

SimplifyX employees must use strong passwords for all business accounts. Passwords must be at least 12 characters long and contain a mix of uppercase letters, lowercase letters, numbers, and special characters. Passwords must be changed every 90 days and must not be reused.

2. VPN Access Rules

Employees accessing internal resources (such as database endpoints, staging environments, and source code control repositories) must connect via the corporate VPN. Sharing VPN credentials or client profiles is strictly prohibited.

3. Incident Response Steps

In the event of a suspected security incident (e.g., lost device, phishing email link click, unauthorized access warning), employees must: (1) Disconnect the affected device from the network; (2) File an incident report in the Security portal; (3) Await instructions from the IT Operations response team.

4. Device Management

Only company-issued or approved personal devices with up-to-date security patches may connect to the corporate network. MDM software must be installed on all laptops used for company operations.
